Automated Rubric Assignment Evaluator

Academic evaluators require an automated workflow to process batch code submissions, execute syntax and test suites, run rubric-based scoring breakdowns, and assign peer reviews without manual distribution overhead.

USE CASE DIAGRAM

REQUIREMENT TABLE

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow the Faculty Evaluator to access the list of student submissions whose evaluations have been completed.	High	Pass: Faculty Evaluator selects View Evaluation Results and the system displays evaluated student submissions. Fail: The system does not display the evaluated submissions.	Allows the Faculty Evaluator to select a submission whose results need to be reviewed.
FR-002	Functional	The system shall allow the Faculty Evaluator to select an evaluated student submission and retrieve its evaluation results.	High	Pass: After selecting a submission, the system retrieves the corresponding evaluation results. Fail: The system cannot retrieve the results for the selected submission.	Enables access to evaluation information for a specific student submission.
FR-003	Functional	The system shall display the test results associated with the selected student submission.	High	Pass: The test results are displayed for the selected submission. Fail: The test results are not displayed or cannot be retrieved.	Test results allow the Faculty Evaluator to understand the outcome of automated testing.
FR-004	Functional	The system shall display the itemized rubric score breakdown for the selected student submission.	High	Pass: The system displays the score associated with each rubric criterion. Fail: The rubric score breakdown is missing or incomplete.	Provides detailed information about how the evaluation score was calculated.
FR-005	Functional	The system shall display the total evaluation score for the selected student submission.	High	Pass: The total evaluation score is displayed. Fail: The total score is unavailable or incorrect.	Allows the Faculty Evaluator to review the final evaluation outcome.
FR-006	Functional	The system shall inform the Faculty Evaluator when evaluation results cannot be retrieved.	Medium	Pass: If results cannot be retrieved, the system displays an unavailable-results message and informs the evaluator that the submission may still be under evaluation. Fail: The system displays incomplete or misleading results.	Handles submissions whose evaluation is incomplete or whose results are unavailable.
NFR-001	Performance	The system shall retrieve and display available evaluation results within a reasonable response time under normal operating conditions.	Medium	Pass: Evaluation results are displayed without significant delay after a submission is selected. Fail: The system takes excessively long to retrieve or display results.	Ensures that evaluators can review results efficiently.
NFR-002	Security	The system shall ensure that evaluation results are accessible only to authorized users.	High	Pass: Only authorized Faculty Evaluators and Students can access permitted evaluation results. Fail: Unauthorized users can access evaluation data.	Protects student evaluation information from unauthorized access.

USE CASE

View Evaluation Results

Use-Case ID: UC-06

Use-Case Name: View Evaluation Results

Primary Actor: Faculty Evaluator

Secondary Actor: Student

Preconditions

1. A student submission has been evaluated.
2. Test results and/or rubric results are available.

Main Success Scenario

1. Faculty Evaluator selects **View Evaluation Results**.
2. System displays the list of evaluated student submissions.
3. Faculty Evaluator selects a student submission.
4. System retrieves the evaluation results.
5. System displays the test results.
6. System displays the itemized rubric score breakdown.
7. System displays the total evaluation score.
8. Faculty Evaluator reviews the results.
9. Use case ends successfully.

Alternate Flow — Results Not Available

4a. System cannot retrieve the evaluation results.

4a1. System displays a message indicating that the results are unavailable.

4a2. System informs the Faculty Evaluator that the submission may still be under evaluation.

4a3. Use case ends without displaying the results.

Postconditions

1. The Faculty Evaluator has viewed the available evaluation results.
2. The system's stored evaluation data remains unchanged.
